**DETAILED ACTION**

---

---

1. An Amendment was filed 11/14/03..

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

**Claims 26-44 and 52-61** are rejected under 35 U.S.C. 102(a) as being anticipated by a supplemental product flyer distributed by "Auto Meter Products, Inc.", printed before June 1999 (as evidenced by the title "New for '99", and statement in center of page, "Available in June!").

Re **Claims 26-44**, Auto Meter discloses a replacement instrument bezel comprising bezel (body of this product) configured to be mounted in a bezel-mounting space defined between a dashboard housing (inherent) and an instrument assembly (unidentified), the latter including a window (inherent) and speedometer (meter towards center of assembly), the original bezel possessing no instrument mounts (i.e., OEM),

one or two instruments secured\* to the bezel in respective instrument mounts, each on opposite sides of the lower portion of the bezel.

\* It is clear that the additional instrument may be installed before or after the replacement bezel is installed, depending on the type of instrument. This feature does not affect the function of the invention.

Re **Claims 52-61**, Auto Meter discloses a method of adding an instrument to a vehicle that includes a speedometer, the obvious steps comprising

removing an original part (instrument bezel) from a mounting space,  
the space including a dashboard with a rim (the rim inherent),  
the space including a viewing opening for a speedometer,

the speedometer located at the rear of a window,

and the original part not possessing instrument mounts (i.e., OEM),

installing a replacement part having at least one instrument mount, the mount located on a front side of a window,

locating the additional instrument(s) before, or after, installation of the replacement part (inherent, and dependent on type of instrument).

(NOTE: It is clear that this method is obvious from viewing the bezel, or any replacement part - removing an original part, and installing a new replacement part, are obvious, if not intuitive, steps.)

3. RESPONSE TO REMARKS

Examiner reiterates her rejections using the flyer distributed by Auto Meter Products. Applicant's arguments are acknowledged. However, it is maintained that because Auto Meter printed and distributed the flyer to its potential clients, it is considered a proper "printed publication" under MPEP paragraph 2128.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
